Mechanisms of Development 55 (1995) 231

Author index

Volume 55 (1996)

Abate-Shen, C., Catron, K.M. **55**, 185
Andreazzoli, M., see Kablar, B. **55**, 145

Barsacchi, G., see Kablar, B. **55**, 145
Boncinelli, E., see Kablar, B. **55**, 145
Brickell, P., see Kostakopoulou, K. **55**, 119

Capdevila, J., see Sánchez-Herrero, E. **55**, 159
Catron, K.M., H. Wang, G. Hu, M.M. Shen, C. Abate-Shen, Comparison of MSX-1 and MSX-2 suggests a molecular basis for functional redundancy **55**, 185
Chatelin, L., M. Volovitch, A.H. Joliot, F. Perez, A. Prochiantz, Transcription factor Hoxa-5 is taken up by cells in culture and conveyed to their nuclei **55**, 111
Ciossek, T., see Hobert, O. **55**, 171
Corbo, J.C., M. Levine, Characterization of an immunodeficiency mutant in *Drosophila* **55**, 211
Couso, J.P., see Sánchez-Herrero, E. **55**, 159

Fuchs, M., see Hobert, O. **55**, 171

Giribaldi, M.G., see Kablar, B. **55**, 145
Guerrero, I., see Sánchez-Herrero, E. **55**, 159

Hobert, O., I. Sures, T. Ciossek, M. Fuchs, A. Ullrich, Isolation and developmental expression analysis of *Enx-1*, a novel mouse Polycomb group gene **55**, 171
Hu, G., see Catron, K.M. **55**, 185

Joliot, A.H., see Chatelin, L. **55**, 111

Kablar, B. **55**, 145
Kablar, B., R. Vignali, L. Menotti, M. Pannese, M. Andreazzoli, C. Polo, M.G. Giribaldi, E. Boncinelli, G. Barsacchi, *Xotx* genes in the developing brain of *Xenopus laevis* **55**, 145
Kaestner, K.H., G. Schütz, A.P. Monaghan, Expression of the winged helix genes *fkh-4* and *fkh-5* defines domains in the central nervous system **55**, 221
Kostakopoulou, K., A. Vogel, P. Brickell, C. Tickle, 'Regeneration' of wing bud stumps of chick embryos and reactivation of *Msx-1* and *Shh* expression in response to FGF-4 and ridge signals **55**, 119

Lake, M., see Mason, C. **55**, 133
Levine, M., see Corbo, J.C. **55**, 211

Mason, C., M. Lake, A. Nebreda, R. Old, A novel MAP kinase phosphatase is localised in the branchial arch region and tail tip of *Xenopus* embryos and is inducible by retinoic acid **55**, 133
McKay, I.J., see Shimeld, S.M. **55**, 201
Menotti, L., see Kablar, B. **55**, 145
Monaghan, A.P., see Kaestner, K.H. **55**, 221

Nebreda, A., see Mason, C. **55**, 133

Old, R., see Mason, C. **55**, 133

Pannese, M., see Kablar, B. **55**, 145
Perez, F., see Chatelin, L. **55**, 111
Polo, C., see Kablar, B. **55**, 145
Prochiantz, A., see Chatelin, L. **55**, 111

Sánchez-Herrero, E. **55**, 159
Sánchez-Herrero, E., J.P. Couso, J. Capdevila, I. Guerrero, The *fu* gene discriminates between pathways to control *dpp* expression in *Drosophila* imaginal discs **55**, 159
Schütz, G., see Kaestner, K.H. **55**, 221
Sharpe, P.T., see Shimeld, S.M. **55**, 201
Shen, M.M., see Catron, K.M. **55**, 185
Shimeld, S.M., I.J. McKay, P.T. Sharpe, The murine homeobox gene *Msx-3* shows highly restricted expression in the developing neural tube **55**, 201
Sures, I., see Hobert, O. **55**, 171

Tickle, C., see Kostakopoulou, K. **55**, 119

Ullrich, A., see Hobert, O. **55**, 171

Vignali, R., see Kablar, B. **55**, 145
Vogel, A., see Kostakopoulou, K. **55**, 119
Volovitch, M., see Chatelin, L. **55**, 111

Wang, H., see Catron, K.M. **55**, 185

Mechanisms of Development 55 (1996) 233–234

Subject index

Volume 55 (1996)

Black cells; *Drosophila*; Immunity; Insect **55**, 211

Bmp-4; *Msx-3*; Homeobox gene; Rhombomere; Neural tube development **55**, 201

Body patterning; *Xenopus*; *Otx* genes; Brain development; Neural induction; Homeobox; **55**, 145

Brain development; *Xenopus*; *Otx* genes; Neural induction; Homeobox; Body patterning **55**, 145

Cycloheximide; Retinoic acid; *Xenopus* embryo; Mitogen-activated protein kinase; Protein phosphatase; Oocyte maturation **55**, 133

decapentaplegic; *fused*; *wingless*; *Drosophila* imaginal discs; Pattern formation; Segment polarity genes **55**, 159

Developmental expression pattern; Mouse Polycomb group gene; Enhancer of zeste; SET domain **55**, 171

Diencephalon; Transcription factor; Winged helix; Muscle deficient **55**, 221

DNA binding; Homeodomain; Transcription; In situ hybridization **55**, 185

***Drosophila* imaginal discs**; *decapentaplegic*; *fused*; *wingless*; Pattern formation; Segment polarity genes **55**, 159

Drosophila; *Black cells*; Immunity; Insect **55**, 211

Enhancer of zeste; Mouse Polycomb group gene; Developmental expression pattern; SET domain **55**, 171

Fibroblast growth factor-4; Limb bud regeneration; Msx-1; Shh **55**, 119

fused; *decapentaplegic*; *wingless*; *Drosophila* imaginal discs; Pattern formation; Segment polarity genes **55**, 159

Homeobox gene; *Msx-3*; Bmp-4; Rhombomere; Neural tube development **55**, 201

Homeobox; *Xenopus*; *Otx* genes; Brain development; Neural induction; Body patterning **55**, 145

Homeodomain; Transcription; DNA binding; In situ hybridization **55**, 185

Homeoprotein; Transcription factor; Hoxa-5 **55**, 111

Hoxa-5; Transcription factor; Homeoprotein **55**, 111

Immunity; *Black cells*; *Drosophila*; Insect **55**, 211

In situ hybridization; Homeodomain; Transcription; DNA binding **55**, 185

Insect; *Black cells*; *Drosophila*; Immunity **55**, 211

Limb bud regeneration; Fibroblast growth factor-4; Msx-1; Shh **55**, 119

Mitogen-activated protein kinase; Retinoic acid; Cycloheximide; *Xenopus* embryo; Protein phosphatase; Oocyte maturation **55**, 133

Mouse Polycomb group gene; Enhancer of zeste; Developmental expression pattern; SET domain **55**, 171

Msx-1; Limb bud regeneration; Fibroblast growth factor-4; Shh **55**, 119

Msx-3; Bmp-4; Homeobox gene; Rhombomere; Neural tube development **55**, 201

Muscle deficient; Transcription factor; Winged helix; Diencephalon **55**, 221

Neural induction; *Xenopus*; *Otx* genes; Brain development; Homeobox; Body patterning **55**, 145

Neural tube development; *Msx-3*; Bmp-4; Homeobox gene; Rhombomere **55**, 201

Oocyte maturation; Retinoic acid; Cycloheximide; *Xenopus* embryo; Mitogen-activated protein kinase; Protein phosphatase **55**, 133

***Otx* genes**; *Xenopus*; Brain development; Neural induction; Homeobox; Body patterning **55**, 145

Pattern formation; *decapentaplegic*; *fused*; *wingless*; *Drosophila* imaginal discs; Segment polarity genes **55**, 159

Protein phosphatase; Retinoic acid; Cycloheximide; *Xenopus* embryo; Mitogen-activated protein kinase; Oocyte maturation **55**, 133

Retinoic acid; Cycloheximide; *Xenopus* embryo; Mitogen-activated protein kinase; Protein phosphatase; Oocyte maturation **55**, 133

Rhombomere; *Msx-3*; Bmp-4; Homeobox gene; Neural tube development **55**, 201

Segment polarity genes; *decapentaplegic*; *fused*; *wingless*; *Drosophila* imaginal discs; Pattern formation **55**, 159
